

Intellectual Takeout App 2.0 is out!

A few weeks ago we released an iPhone app for Intellectual Takeout. It was received really well and a number of folks recommended changes, such as sorting by categories and the ability to “favorite” or “bookmark”, to make it better. We listened and got to work on a new version.

The changes made the Intellectual Takeout app really awesome. Even more awesome is the news that Apple has approved version 2.0 and it's available for downloading. Below are some screenshots of what you should expect.

We'll continue to refine the app so if you have comments or ideas, please let us [know](#)! Also, we'll be working on an Android version next. Sorry! As soon as that is ready, we'll post it to the Facebook page and send an announcement in the e-mail newsletter. Thanks!
